

Iowa Transportation Research

Collaboration Agreement

Iowa Department of Transportation
University of Iowa
University of Northern Iowa
Iowa State University
Institute for Transportation

Whereas the Iowa Department of Transportation (DOT), and the Iowa Regents' universities (University of Iowa, University of Northern Iowa, Iowa State University), and the Institute for Transportation (InTrans) herein identified as the "parties," desire to develop a process to facilitate transportation research to benefit the State of Iowa; and

Whereas each party has resources and expertise engaged in transportation research; and

Whereas each party desires to coordinate and collaborate productively; and

Whereas the parties can combine resources and expertise to advance transportation research for Iowa:

Therefore, the parties intend to accomplish these objectives through the following processes:

1. The universities, InTrans and the DOT shall support, participate in and lead, as appropriate, various transportation research focus groups whose objective is to identify needed research initiatives for Iowa. Research would be carried out through the Iowa Highway Research Board and the Iowa DOT. The focus group meetings would address these aspects of transportation: traffic and safety, geotechnical, maintenance, pavements, construction, drainage and roadside vegetation, structures, planning, environment, economics and finance, and transportation modes. These focus groups would each meet as often as the parties deem necessary. The DOT shall provide support as appropriate to the focus group process;
2. The parties shall participate in semi-annual Collaboration Meetings to discuss identified research needs from the focus group meetings, and the available research expertise and facilities. A review of what has been accomplished to date and what is planned for the future, as a result of this agreement, will be included in these meetings. The meetings shall be held on a rotating basis at the DOT and university locations;
3. The parties shall reasonably collaborate and support each other on initiatives undertaken independently with sponsors beyond Iowa, such as the National Science Foundation, National Cooperative Highway Research Program (NCHRP), Transportation Research Board of the National Academies of Science, the U.S. Department of Transportation and other states. The Iowa DOT shall make its facilities available, as appropriate, for such sponsored research as may relate to the DOT's responsibilities.

In accordance with these processes, and by executing this agreement, the parties confirm their intent to mutually advance the transportation research interests of Iowa by executing this agreement, effective April 9, 2003.

Kevin Mahoney, Director
Highway Division
Iowa Department of Transportation

William Decker
(Interim) Vice President for Research
University of Iowa

James Bloedel
Vice Provost for Research & Advanced Studies
Iowa State University

John Somervill
