

NORTH CAROLINA DOT

State Report Questions

April 26-28, 2011 TTCC/NCC Meeting

1. Summarize your state's current QC/QA requirements for pavements.
NCDOT does not have a QC/QA program for concrete pavement.

2. Identify any differences in QC/QA requirements on projects with accelerated schedules.

N/A

3. Summarize the requirements for allowable time between batching and placement for agitated and non-agitated concrete mixes.

60 minutes from point mixing water is introduced to point that concrete is placed, finished, screeded, and completed micro-finishing (Burlap drag).

4. Summarize acceptance and payment adjustment clauses related to QC/QA requirements.

None
