

Ctag – Sample and Data Tracking System for Concrete

Tyler Ley, Qinang Hu, Jake LeFlore,
Austin Ross, Zane Lloyd

Why I do what I do

I believe concrete is the best material in the world.

I want to making it easier to construct, more durable, lower cost, and more sustainable.

I build people and tools to make the concrete industry better.

Why I do what I do

I believe concrete is the best material in the world.

I want to making it easier to construct, more durable, lower cost, and more sustainable.

I build **people and tools** to make the concrete industry better.

Overview

Field problem

The Journey

The Future!

Ask

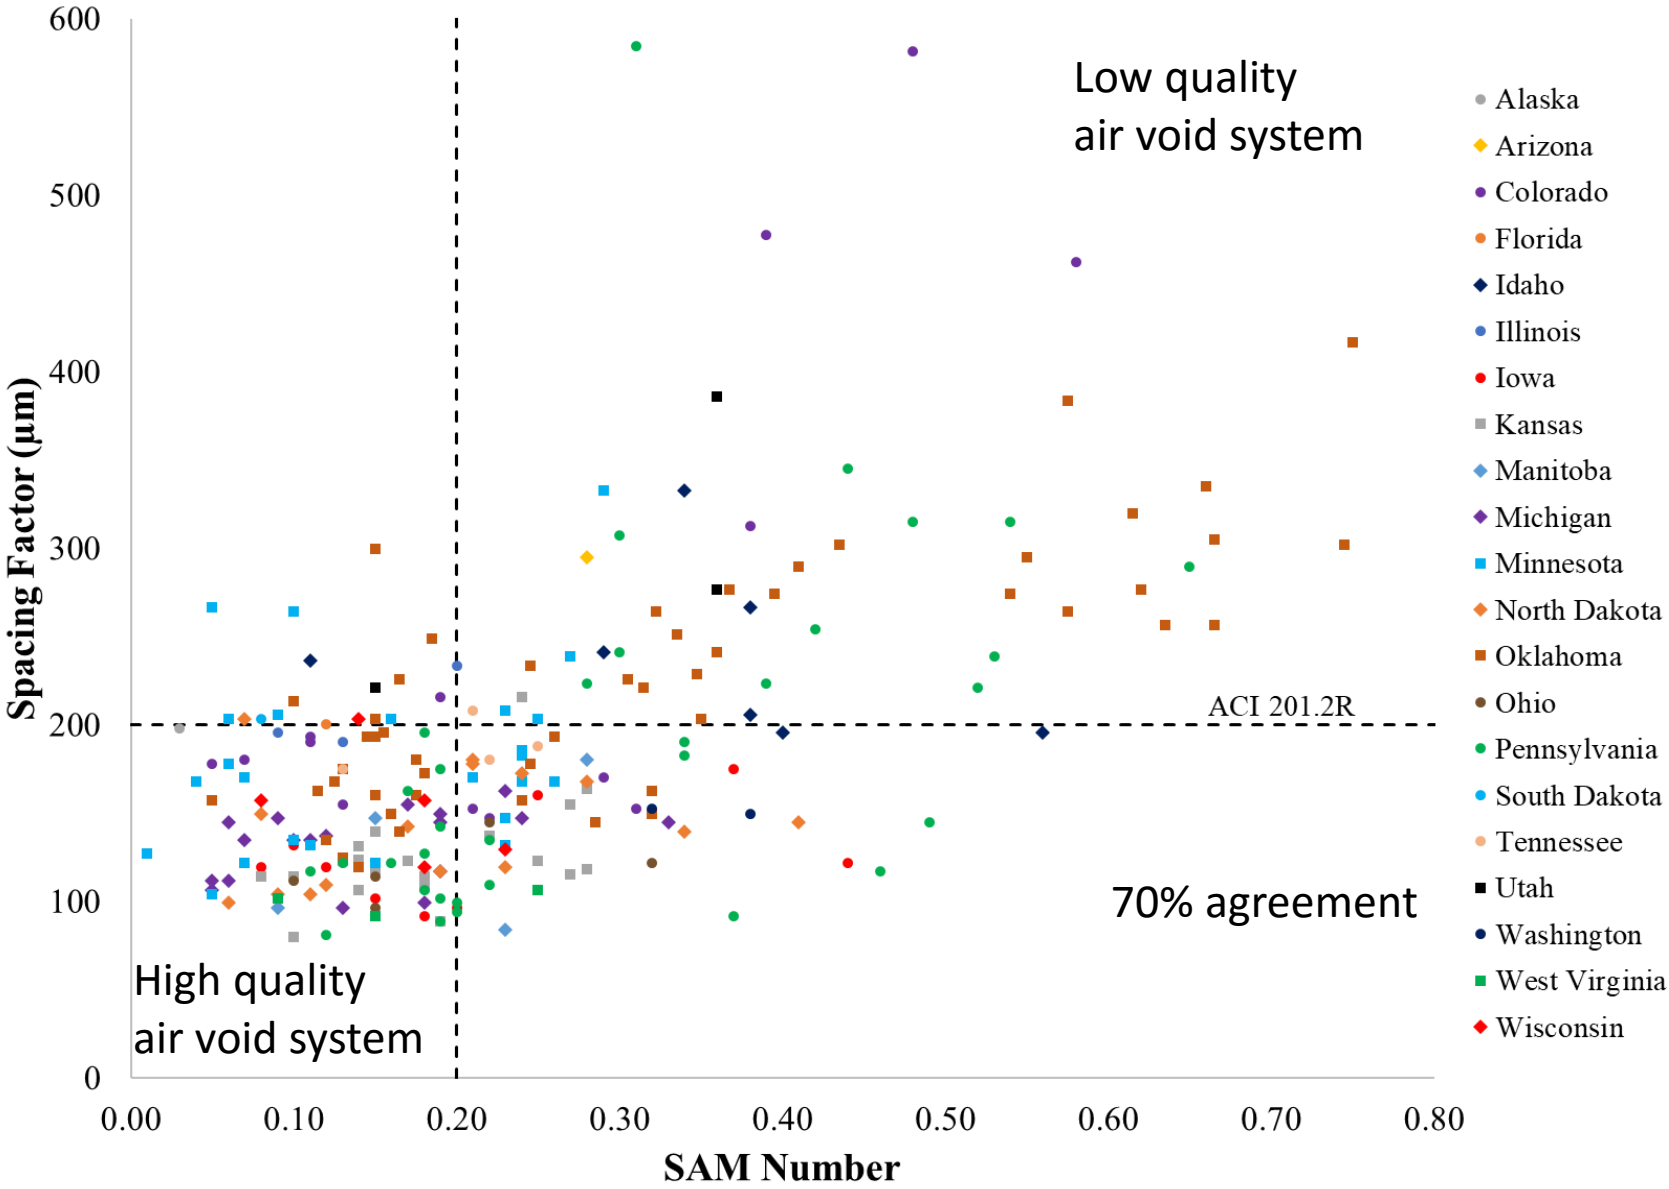

SAM field study (2016-2017)

231 samples from
110 different
projects

21 different states

231 field mixes

Thank you!!!

- Alaska
- Arizona
- Colorado
- Florida
- Idaho
- Illinois
- Iowa
- Kansas
- Manitoba
- Michigan
- Minnesota

- West Virginia
- Wisconsin
- FHWA Mobile Lab

SAM field study (2016-2017)

325 samples were sent

231 samples were samples

SAM field study (2016-2017)

325 samples were sent

231 samples were samples

**94 samples were poorly labeled or
could not link sample to field data**

30% of total!

There has to be a better way!!!

There has to be a better way!!!

There has to be a better way!!!

There has to be a better way!!!

What are the benefits?

- Reduce paperwork
- Increase productivity
- Maintain inventory
- Track chain of custody
- Decrease human errors

What are the benefits?

An acceptable data entry rate is 1%.

An acceptable bar code entry rate is 0.01%.

What are the benefits?

> 5 billion bar codes
used every day!!!!

Bar codes used to travel to NCC

Drivers license x 4

Plane ticket x 3

Checked Luggage

Air port food x 3

Rental car

12 total bar code uses!

How do we get barcodes on concrete?

We need to label both the specimen and the mold

What if we could label the fresh concrete as it is being made and disturb it.

The label must be durable and inexpensive.

There has to be a better way!!!

Summary

Summary

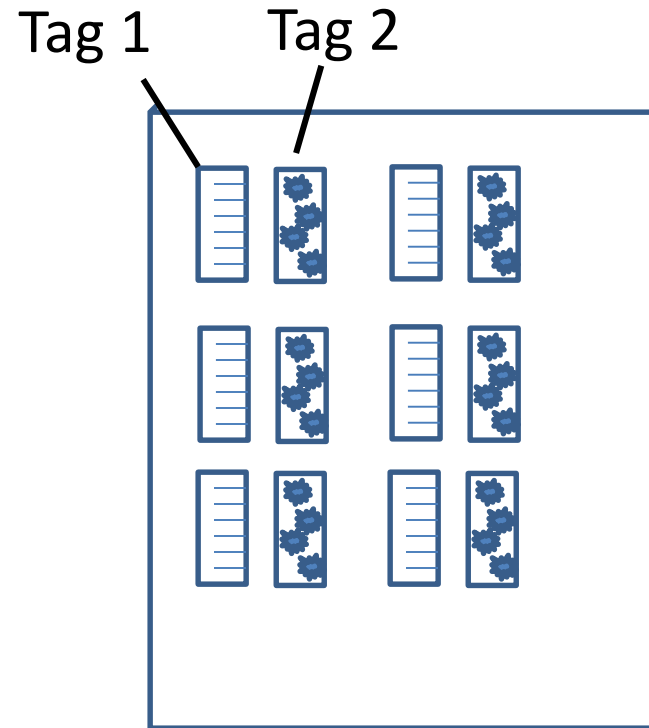

The Ctag is a label that can be used on the inside and outside of the cylinder

The Ctag bonds to the surface of the concrete and allows for easy labeling of the concrete

How do we make them?

How do we make them?

We made the first versions by hand and distributed them in sheets.

How do we make them?

This was a pain and so we started to make them in rolls.

To do this we made our own machine!!!

How do you get them apart?

Profile

Summary

A machine was made to produce perforate, and place them in a roll.

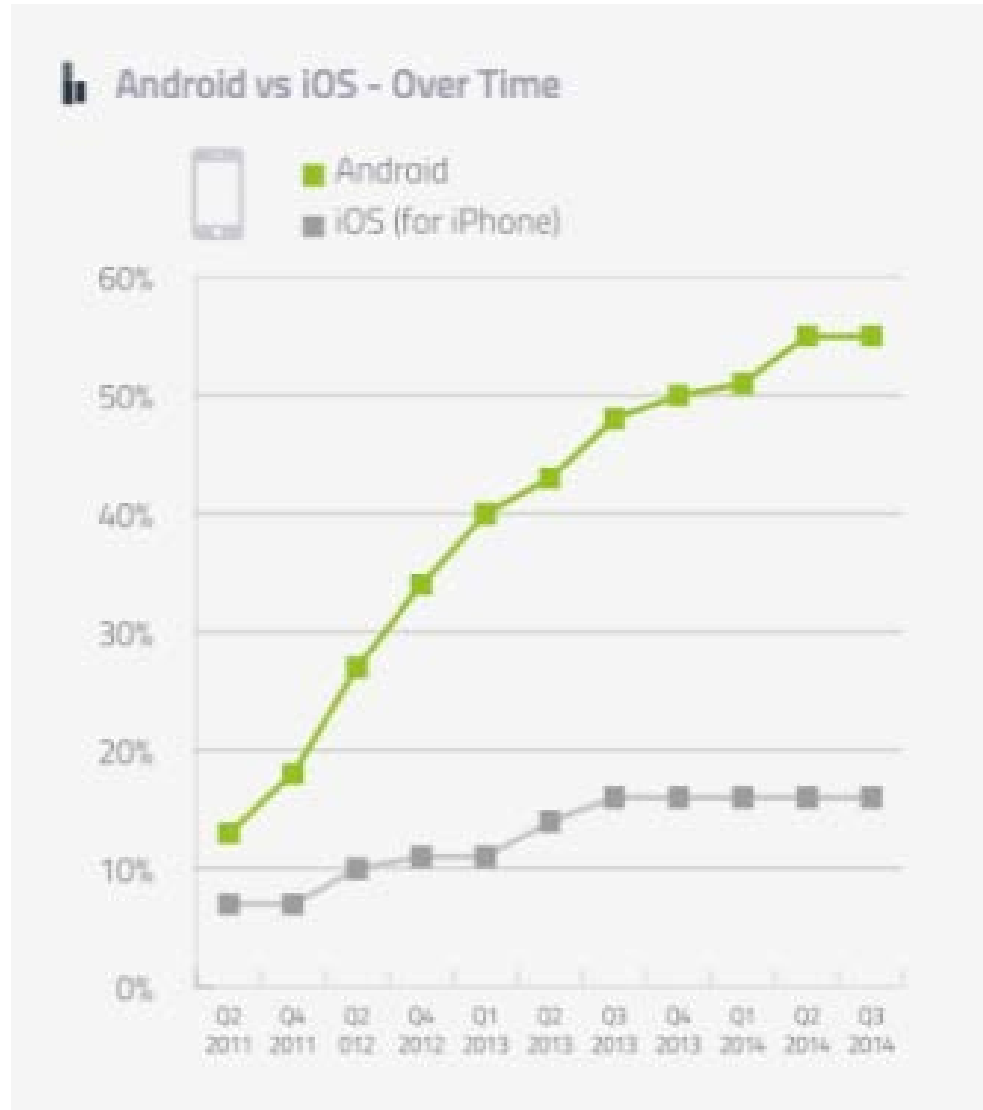

They come in boxes of 100!

How do you read them?

How do you read them?

How do you read them?

Android

Apple

How do you read them?

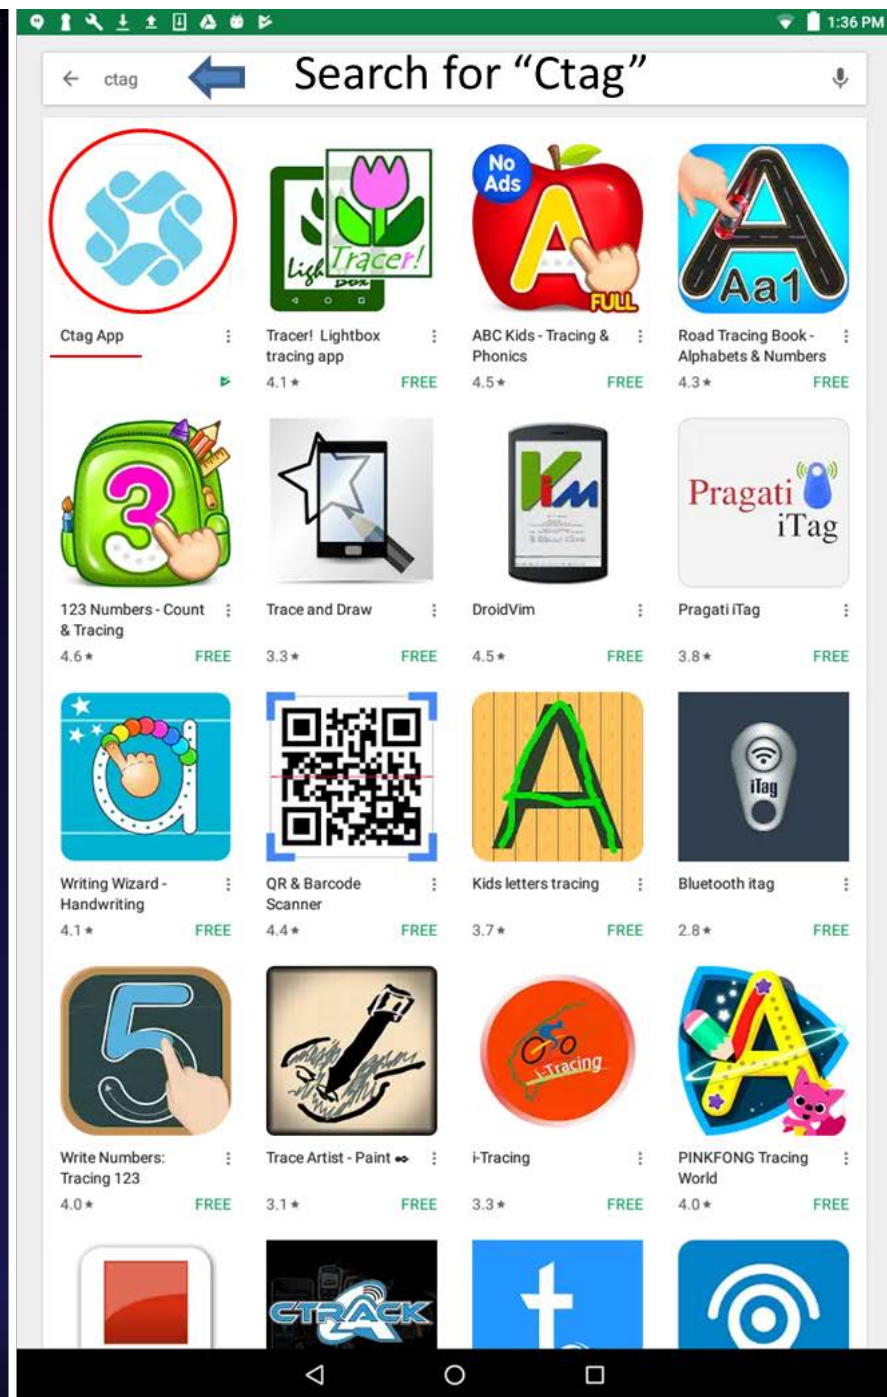

We started using existing apps for inventory management.

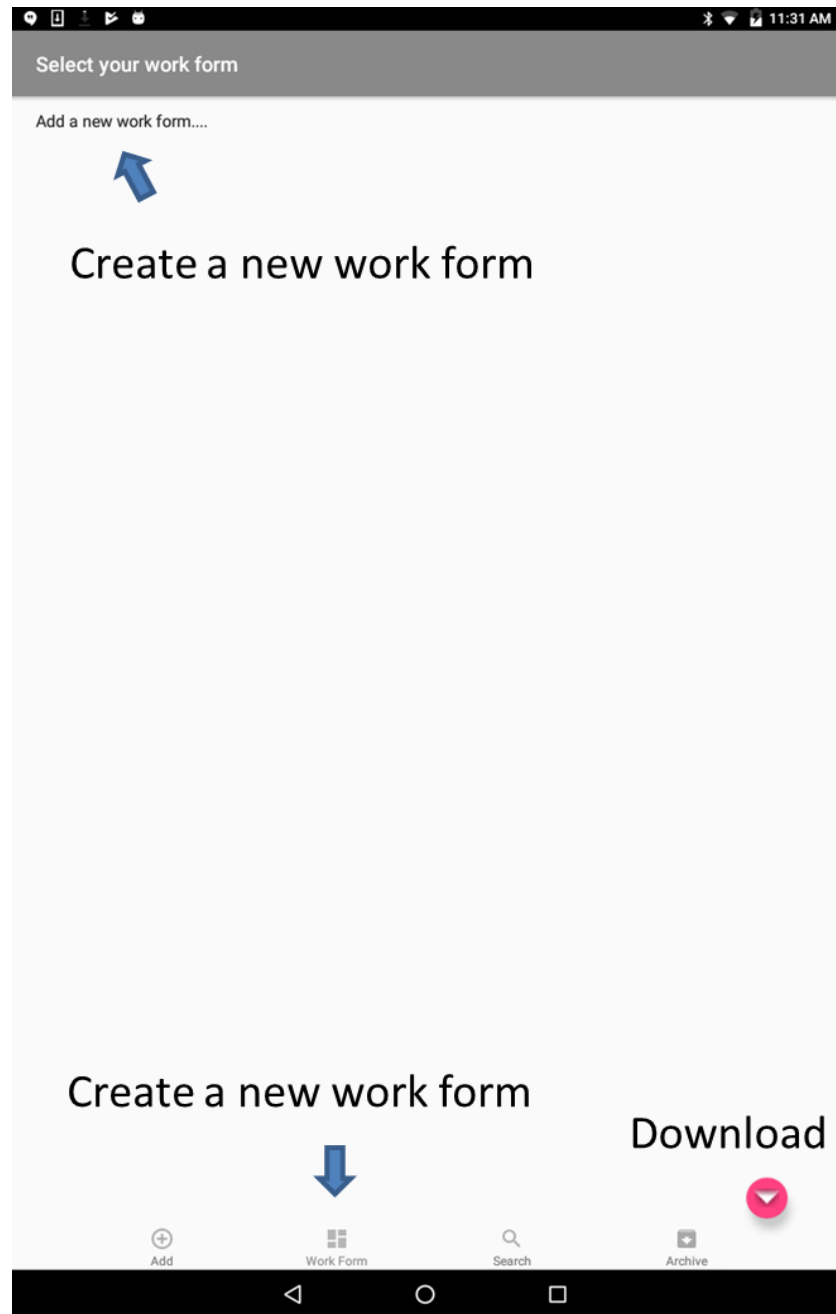

They were not very flexible and costly.

So, they made their own.

How do you read them?

Search Ctag on the Google Play Store

Barcode Scanner

Can I change the entries?

The app allows you to change any entry that you want.

You can also build forms in excel an upload it to the app.

How do I get my data?

Summary

An app was created to read the Ctags and manage the data that corresponds to the samples.

The app is simple and flexible.

The app is constantly improving.

Roll out 1.0

These groups have already received Ctags and played with a previous version of the app.

Oklahoma DOT

Michigan DOT

Minnesota DOT

Texas DOT

FHWA Mobile Trailer

Dolese Bros.

Ozinga Ready Mix

Michelle's Ready Mix

Roll out 2.0

We are about to collect a lot of data with PEM testing.

This would be a great time to make sure that the results and samples are well documented.

If you are interested then please sign up!

What are the benefits?

Reduce paperwork

Increase productivity

Maintain inventory

Track chain of custody

Decrease human errors

Other possible benefits

Real time data sharing of data for owners, contractors, etc.

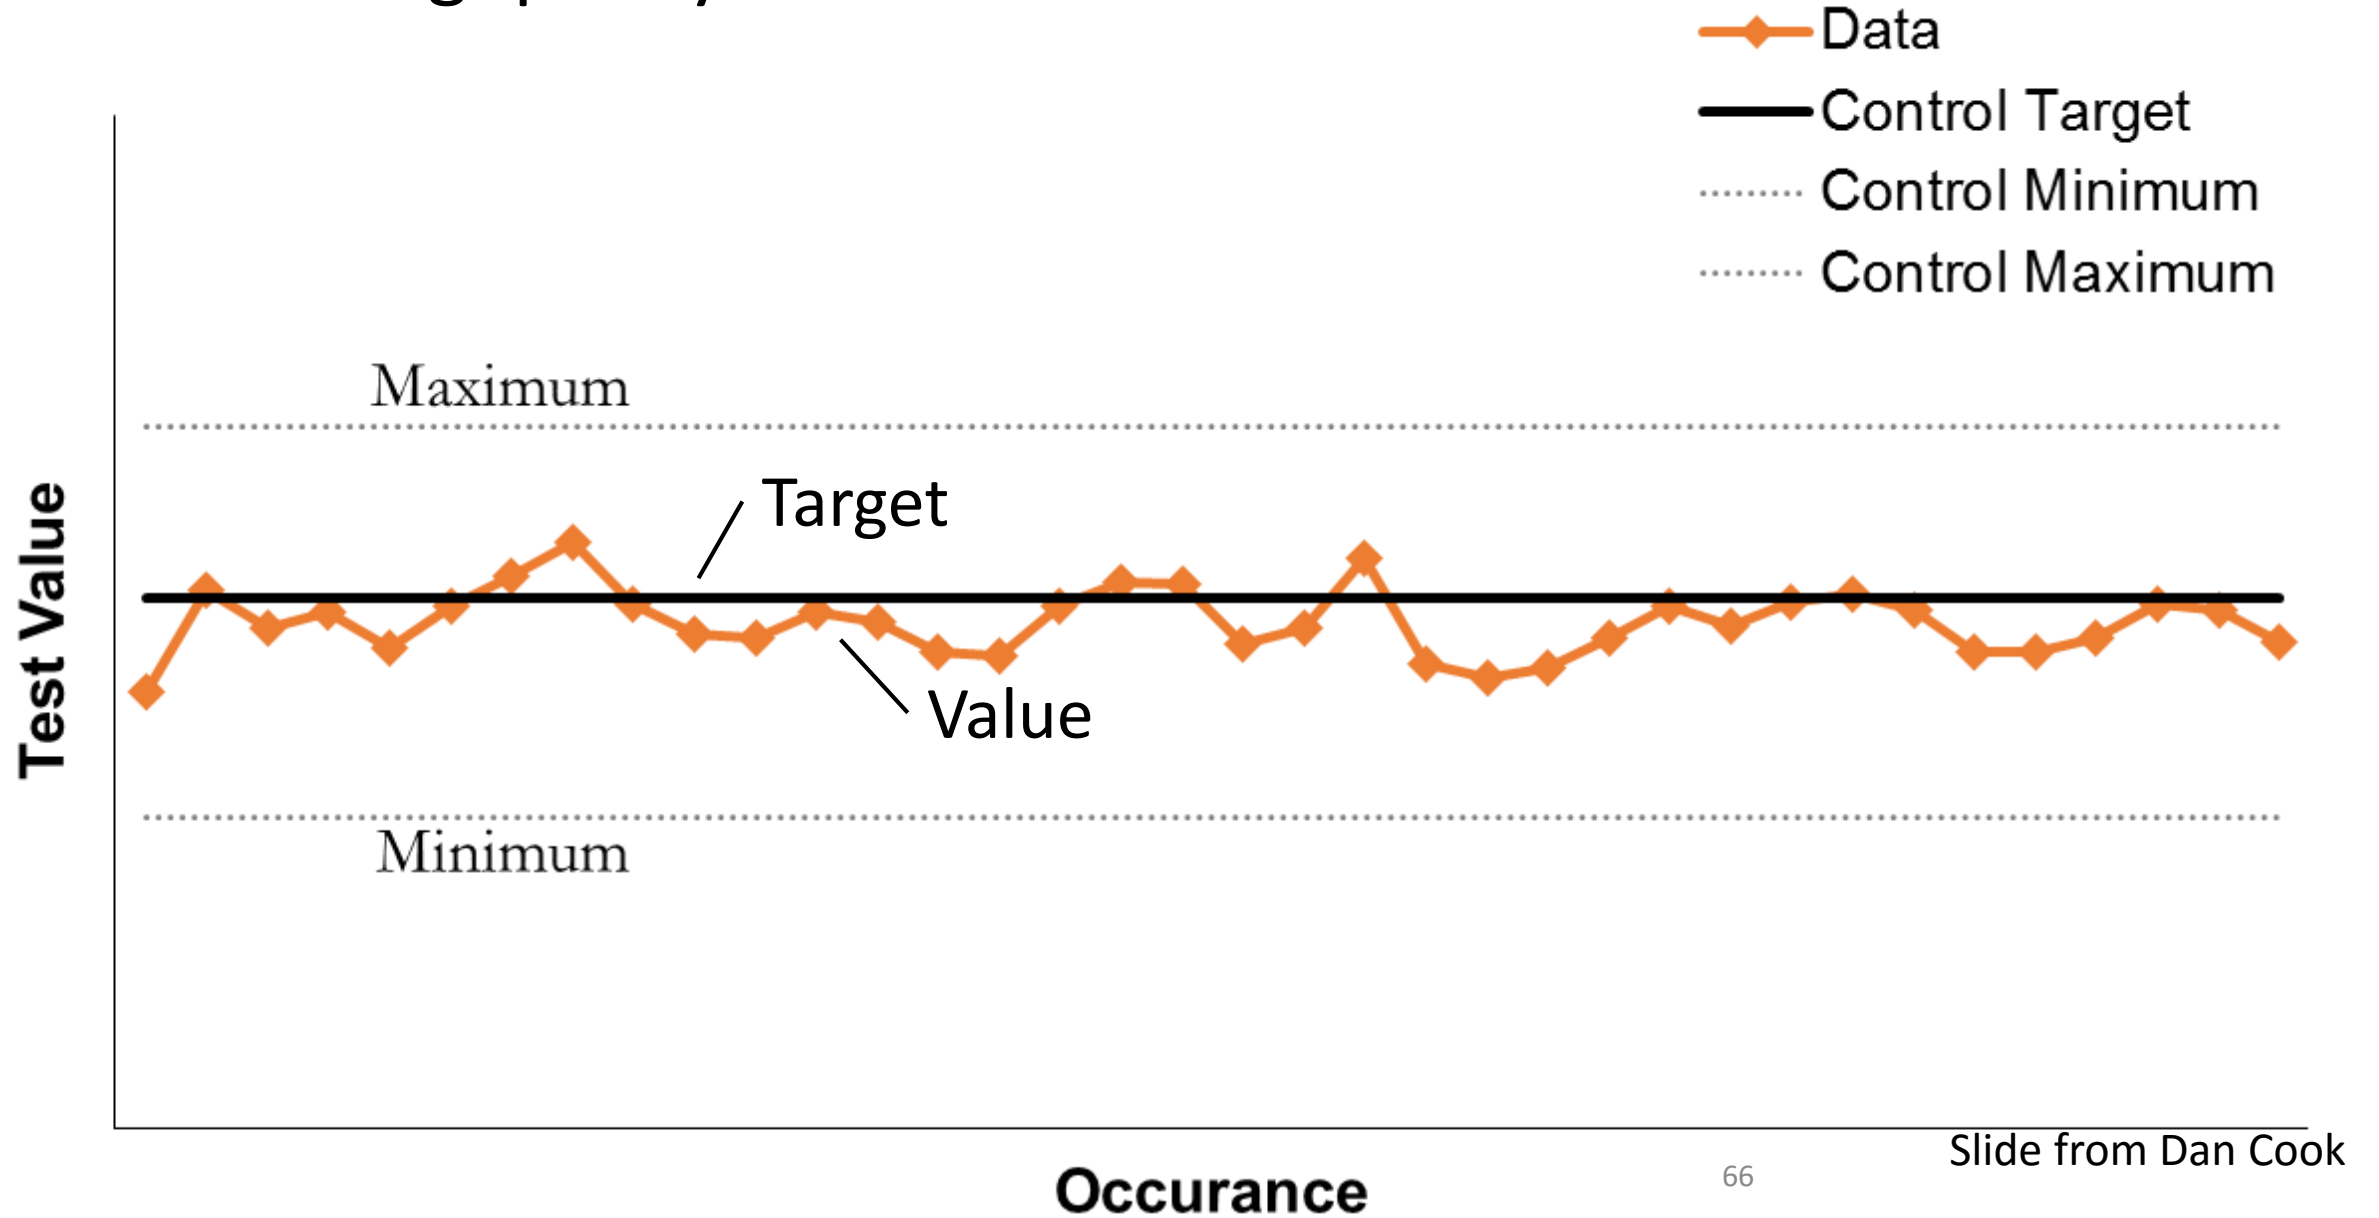

Email when results don't meet specifications

Instant pay calculation

Automated report creation

Redundancy of data

Amazing quality control tool

Other possible benefits

Can be used to track any material

Efforts like this inspires the new generation!

They will do things we have not even dreamed of!!!!

They will do things we have not even dreamed of!!!!

Does the Ctag impact strength?

Compared 4x8 cylinder strengths for 16 different mixtures with and without Ctags

< 2% difference in strength

All standard deviations within ASTM C39 tolerance

How long do they last on concrete?

Outside ~ 2 years

Fog room > 2 years

Survived ASTM C666 testing

170F the glue fails

What can the app measure?

GPS coordinates

Weather

Time

Technician

Any property....

What do you want?

Will it interface with my other software?

Google Docs or Excel

Comma separated or any other formatted file format

Python code that automatically transfers data between a file and your software

Automated data transfer to SiteManager

Conclusion

The Ctag is a new way to label concrete cylinders.

The Ctag app can catalog information from the field and send it to the cloud.

Conclusion

It was created by the next generation of the concrete industry to make their lives better.
