

**State DOT: Oklahoma**

**State Report Questions on MEPDG Implementation**

1. Summarize your state's status as far as MEPDG Implementation.  
We are continuing to work toward full implementation. We are currently evaluating the recently released DarWin ME.
  
2. What efforts have been made toward local calibration?  
We have several research projects that have been completed or are still in progress that have been helpful in evaluating material properties and construction techniques.
  
3. What additional information/support would assist your state with implementation?  
A local workshop that would provide more in depth guidance/ information on the new DarWin ME software would be helpful. I'd like to include some of our researchers so we could get a better understanding of some of the intended design/performance concepts.
