Clear Roads Overview

Craig Bargfrede, Iowa Department of Transportation

Abstract

Clear Roads is a national research consortium focused on rigorous testing of winter maintenance materials, equipment and methods used by winter maintenance crews. This consortium began in 2004 and has grown to include 36 member agencies, each contributing \$25,000 annually to fund research and technology transfer efforts. Members from the participating Departments of Transportation meet twice a year to discuss and prioritize projects, share best practices and review research results.
