Refer to the contract documents for dimensions, grades, and additional requirements for permeable interlocking pavers and associated improvements.

1. Permeable interlocking pavers as specified in the contract documents.
2. 2 inch minimum permeable pavement bedding aggregate to accommodate imperfections in the permeable pavement filter aggregate layer.
3. Permeable pavement storage aggregate thickness as specified in the contract documents.
4. When underdrain collectors and/or laterals are specified, install to the line and grade specified in the contract documents. Place permeable pavement filter aggregate to springline of pipe.
5. Place 4 inches of filter aggregate under curb and gutter section. Extend to 12 inches beyond the back of curb. Extend engineering fabric under aggregate.
6. Install paver edge restraint system along unrestrained edges.

Place engineering fabric over subgrade and up sides of excavation.

Possible PCC curb and gutter or adjacent pavement.

Place filter aggregate around underdrain.

Slope at 0% or as specified in the contract documents.

Permeable interlocking pavers
Bedding Aggregate
4" Layer of Filter Aggregate
Storage Aggregate

Install 6" slotted underdrain laterals and filter material when specified.

Slope subgrade as specified.

Install 6" perforated underdrain collector when specified.

2" minimum
