For temporary runouts and wedges, place subgrade paper, burlap, or similar material over adjacent surfaces to facilitate removal. Construct temporary runout at a length of 10 feet for each 1 inch of resurfacing thickness.

Construct wedge shaped asphalt fillets at all paved entrances and paved roads. Construct full thickness fillets at all non-paved entrances and non-paved roads.

1. Width of fillet is 4 feet for each inch of overlay thickness.
2. The runout length of the intermediate course is equal to the total runout length, multiplied by the intermediate course thickness, divided by the total resurfacing thickness.
3. Excavate and shape road entrance as required to accommodate proposed fillet.
4. For existing fillets at non-paved roads and entrances, construct a wedge shaped fillet matching the thickness of the resurfacing.
5. Match width and shape of existing pavement.

### Minimum Fillet Width

### Section A-A

**Full Thickness Fillet - Non-paved Road**

- Edge of Pavement
- Surface of Existing Non-Paved Road
- Granular Surfacing
- Intermediate Course (when specified in the contract documents)
- Existing Pavement
- 6" min. (excavate as required)

**Section A-A**

**Wedge Shaped Fillet - Paved Entrance or Road**

- Edge of Pavement
- Surface of Existing Paved Entrance or Road
- Intermediate Runout
- Sand Seal
- Surface Course
- Intermediate Course (when required)
- Existing Pavement
- Shoulder Width (min. 4')

**Section A-A**

**Full Thickness Fillet - Non-paved Entrance**

- Edge of Pavement
- Surface of Existing Non-Paved Road
- Intermediate Course (when specified in the contract documents)
- Existing Pavement
- 6" min. (excavate as required)
