Concrete Paving Field Inspection Inspector’s Workshop
PCC Paving Field Inspection

- **Why are we here?**
- How do we achieve quality for PCC paving?
- Got a project….Now what?
- What is concrete?
- What kinds of equipment are used?
- What happens before you start paving?
- What happens when you’re finally paving?
- What is the inspector’s role?
- What about all of the other road building stuff?
- What do you look for in urban paving.
- What paperwork?

Why are we here?

• PCC in paving applications has different requirements than structural applications

• Pavements typically function in extremely challenging environments where they can be subjected to very high moisture and temperature changes on a frequent basis
Why are we here?

PCC Paving Applications

- Highway pavements
- Streets and local roads
- Airfield pavements
- PCC overlays
- Parking areas
Pavement Elements

Select parameters that economically meet needs of your project

- Support system
- Environment
- Materials
- Thickness
- Joint spacing
- Load transfer
why are we here?

Quality
Consistency
Durability
